OUR TECHNOLOGY

Imported Machinery

Accuracy and precision of products is utmost necessity of high quality tiles. To meet the highest standards of performance, we have adapted imported machinery and systems. They ensure low rejection occurrence at the floor as well as at site.

Indigenous Machinery and Equipment

India has grown technologically in past decade. There are a number of high precision machines manufactured in India that perform at peak even when stressed. We have made sure to use these machines and equipments.

Coloring Process

As all can understand, coloring is the most critical process in the total production cycle where tiles need to beat properties of marble. This is our most secret process defined internally to use technology, practices and procedures to retain the beauty of products for decades without fading or losing shine.

Special Colour

All about the colour feel
that craft man has
crafted with immense
excellence.
